What is the Web Session about?

Topic and Review 2023

Web Session Power Electronics

Power electronics are experiencing a boom, thanks to the numerous applications for inverters or frequency converters in then electronic drive technology (e-mobility), solar inverters and converters for wind turbines for feeding wind turbines for feeding renewable energy into the grid or switching power supplies. As a result, the smart production of power electronics is becoming increasingly important.

Target group: Owners, managing directors, technical managers of medium-sized industrial companies, production management/manufacturing management, factory and production planners of larger companies
